## \*EXPLANATION OF ZONE DESIGNATIONS

EXPLANATION

Areas of 100 -year flood; base flood elevations and flood hazard

Areas of 100-year shallow flooding where depths are between one (1) and three (3) feet; average depths of inundation are

shown, but no flood hazard factors are determined. Areas of 100-year shallow flooding where depths are between

one (1) and three (3) feet; base flood elevations are shown, but no flood hazard factors are determined.

A1-A30 Areas of 100-year flood; base flood elevations and flood hazard factors determined. Areas of 100-year flood to be protected by flood protection

system under construction; base flood elevations and flood hazard factors not determined. Areas between limits of the 100-year flood and 500-year flood; or

certain areas subject to 100-year flooding with average depths less than one (1) foot or where the contributing drainage area is less than one square mile; or areas protected by levees from the base flood. (Medium shading)

Areas of minimal flooding. (No Shading)

Areas of undetermined, but possible, flood hazards.

Areas of 100-year coastal flood with velocity (wave action); base flood elevations and flood hazard factors not determined.

Areas of 100-year coastal flood with velocity (wave action); base flood elevations and flood hazard factors determined.

NOTES TO USER This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local

drainage sources of small size, or all planimetric features outside Special Flood Hazard Areas. The community map repository should be consulted for possible updated flood hazard information prior to use of this map for property purchase or construction purposes. Coastal base flood elevations apply only landward of **0.0** NGVD, and include the

developed by the National Weather Service for hurricane evacuation planning. Areas of special flood hazard (100-year flood) include Zones A, A1-A30, AH, AO and  $\alpha$ A99, V, and V1-V30.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. For adjoining map panels see separately printed Map Index.
